Professional Summary

Performance-driven Global Business Services (GBS) Analyst with 3+ years of experience in campaign management, ad operations, and strategic data execution. Expert in acting as the operational backbone for campaign delivery by translating complex datasets into clear data stories and actionable narratives. Distinguished for leveraging Python, SQL, and Power BI to automate tracker testing, optimize performance across multiple platforms, and consolidate data from salesforce. A collaborative team player with a proven ability to manage high work volumes, adhere to strict SLAs, and resolve cross-functional queries alongside Sales, Product, and Account Management teams.

Technical Core Competencies

- Ad Operations:** End-to-End Campaign Setup, Tracker Testing, Screenshot Documentation.
- Analytics & Reporting:** Data Storytelling, Descriptive & Diagnostic Analysis.
- Languages & AI:** Python (Pandas, Scikit-learn), Advanced SQL, NLP, Predictive Behaviors, Anomaly Detection.
- Tools & Dashboards:** Power BI (Certified), Advanced MS Excel, PowerPoint, Tableau, Salesforce CRM.

Professional Experience

AstraZeneca India	Chennai, India
<i>Sr. Analyst – Global Business Operations & Analytics</i>	<i>June 2023 – Present</i>
- Accomplished 100% SLA and TAT adherence for 3,000+ monthly multifaceted requests by executing end-to-end campaign operations, including setup, modifications, and tracker testing using a custom Python automation framework. - Accomplished a unified performance view as measured by improved reporting accuracy by extracting and consolidating data from internal SQL databases and third-party attribution platforms into actionable data stories. - Accomplished a 15-hour weekly reduction in manual delivery reports by architecting an automated Salesforce data engine, utilizing descriptive analysis to identify trends and predict behaviours for regional accounts. - Accomplished flawless campaign delivery as measured by zero-deficiency audits by collaborating with cross-functional internal teams (Sales, Account Management, Finance) to resolve platform delivery issues proactively. - Accomplished \$200,000 in fiscal optimization as measured by direct bottom-line impact by architecting NLP-driven diagnostic analysis to consolidate 50,000+ disparate records across target audiences.	
Positive Integers Consulting Ltd	Chennai, India
<i>Data Analyst – Business Intelligence & Campaign Management</i>	<i>June 2022 – April 2023</i>
- Accomplished a 25% reduction in on-boarding time for new team members by acting as a knowledge resource and authoring internal procedures, policies, and tutorials related to campaign setup and reporting. - Accomplished a 60% increase in actionable lead identification by building interactive dashboards and reports in Power BI, translating complex datasets into meaningful business narratives for non-technical clients. - Accomplished a 30% reduction in discrepancy resolution time as measured by client satisfaction by managing data flows and closely tracking live performance to ensure adherence to client specifications.	

Strategic Initiatives

AI-Driven Data Storytelling & Insight Generation <i>Python, SQL, Attribution Data</i>	<i>Apr 2024 – May 2024</i>
Accomplished the identification of \$200,000 in prospective growth opportunities as measured by predictive simulations, leveraging external and internal datasets to uncover strategic business goals.	
Interactive Dashboard Automation <i>Power BI, UI/UX Wireframes</i>	<i>Aug 2022 – Jan 2023</i>
Accomplished a 360-degree view of stakeholder metrics by designing robust internal performance and delivery reports from scratch, serving as a point of contact for tracking campaign execution.
